

PRODUCT OVERVIEW

STORMAGIC SvHCI AN INTRODUCTION

ABOUT SvHCI

StorMagic SvHCI is a full-stack hyperconverged infrastructure solution purpose-built for the enterprise edge, remote and branch offices (ROBOs), and small and medium businesses (SMBs). SvHCI combines the virtualized storage capabilities of SvSAN with a StorMagic hypervisor, virtualized networking, and management components. SvHCI includes 24x7 StorMagic Platinum support for the entire HCI stack.

BENEFITS OF SvHCI

Purpose-built for enterprise edge, ROBO and SMB environments

Radically simple, integrated full-stack HCI solution

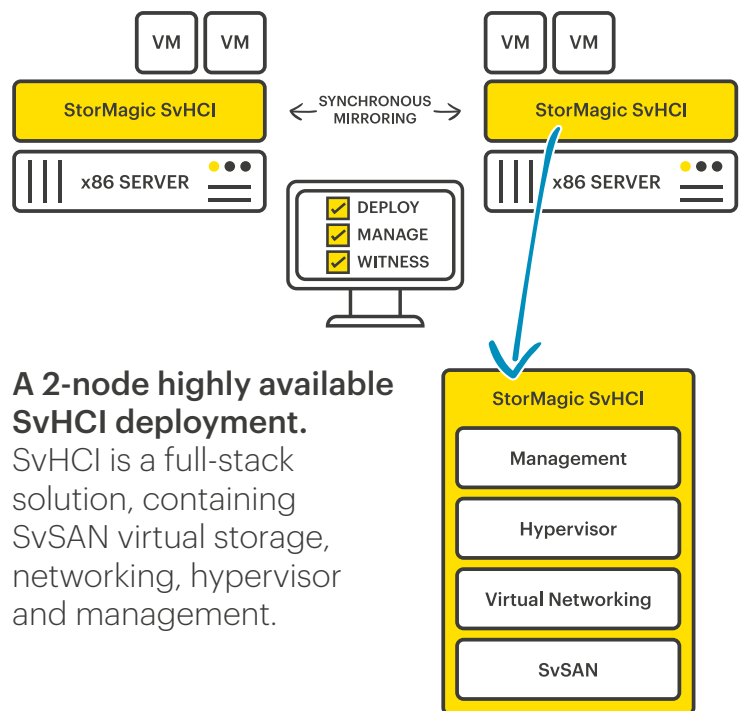

Rock solid, proven technology built on KVM and SvSAN

Designed for 100% uptime with enterprise-class reliability

Support from StorMagic for the entire stack

FULL-STACK HYPERCONVERGED INFRASTRUCTURE

A 2-node highly available SvHCI deployment.

SvHCI is a full-stack solution, containing SvSAN virtual storage, networking, hypervisor and management.

THE MOST COST-EFFECTIVE HCI SOLUTION FOR THE EDGE AND SMBS

Save up to **62%** over VMware

Save at least **33%** on HCI hardware

LESS power, cooling, spares, and person-hours required
